

# Here is step by step instructions on setting up your Truck Stock application

Contact me on the web site and ill send you a link to my dropbox where there are saved images you can use

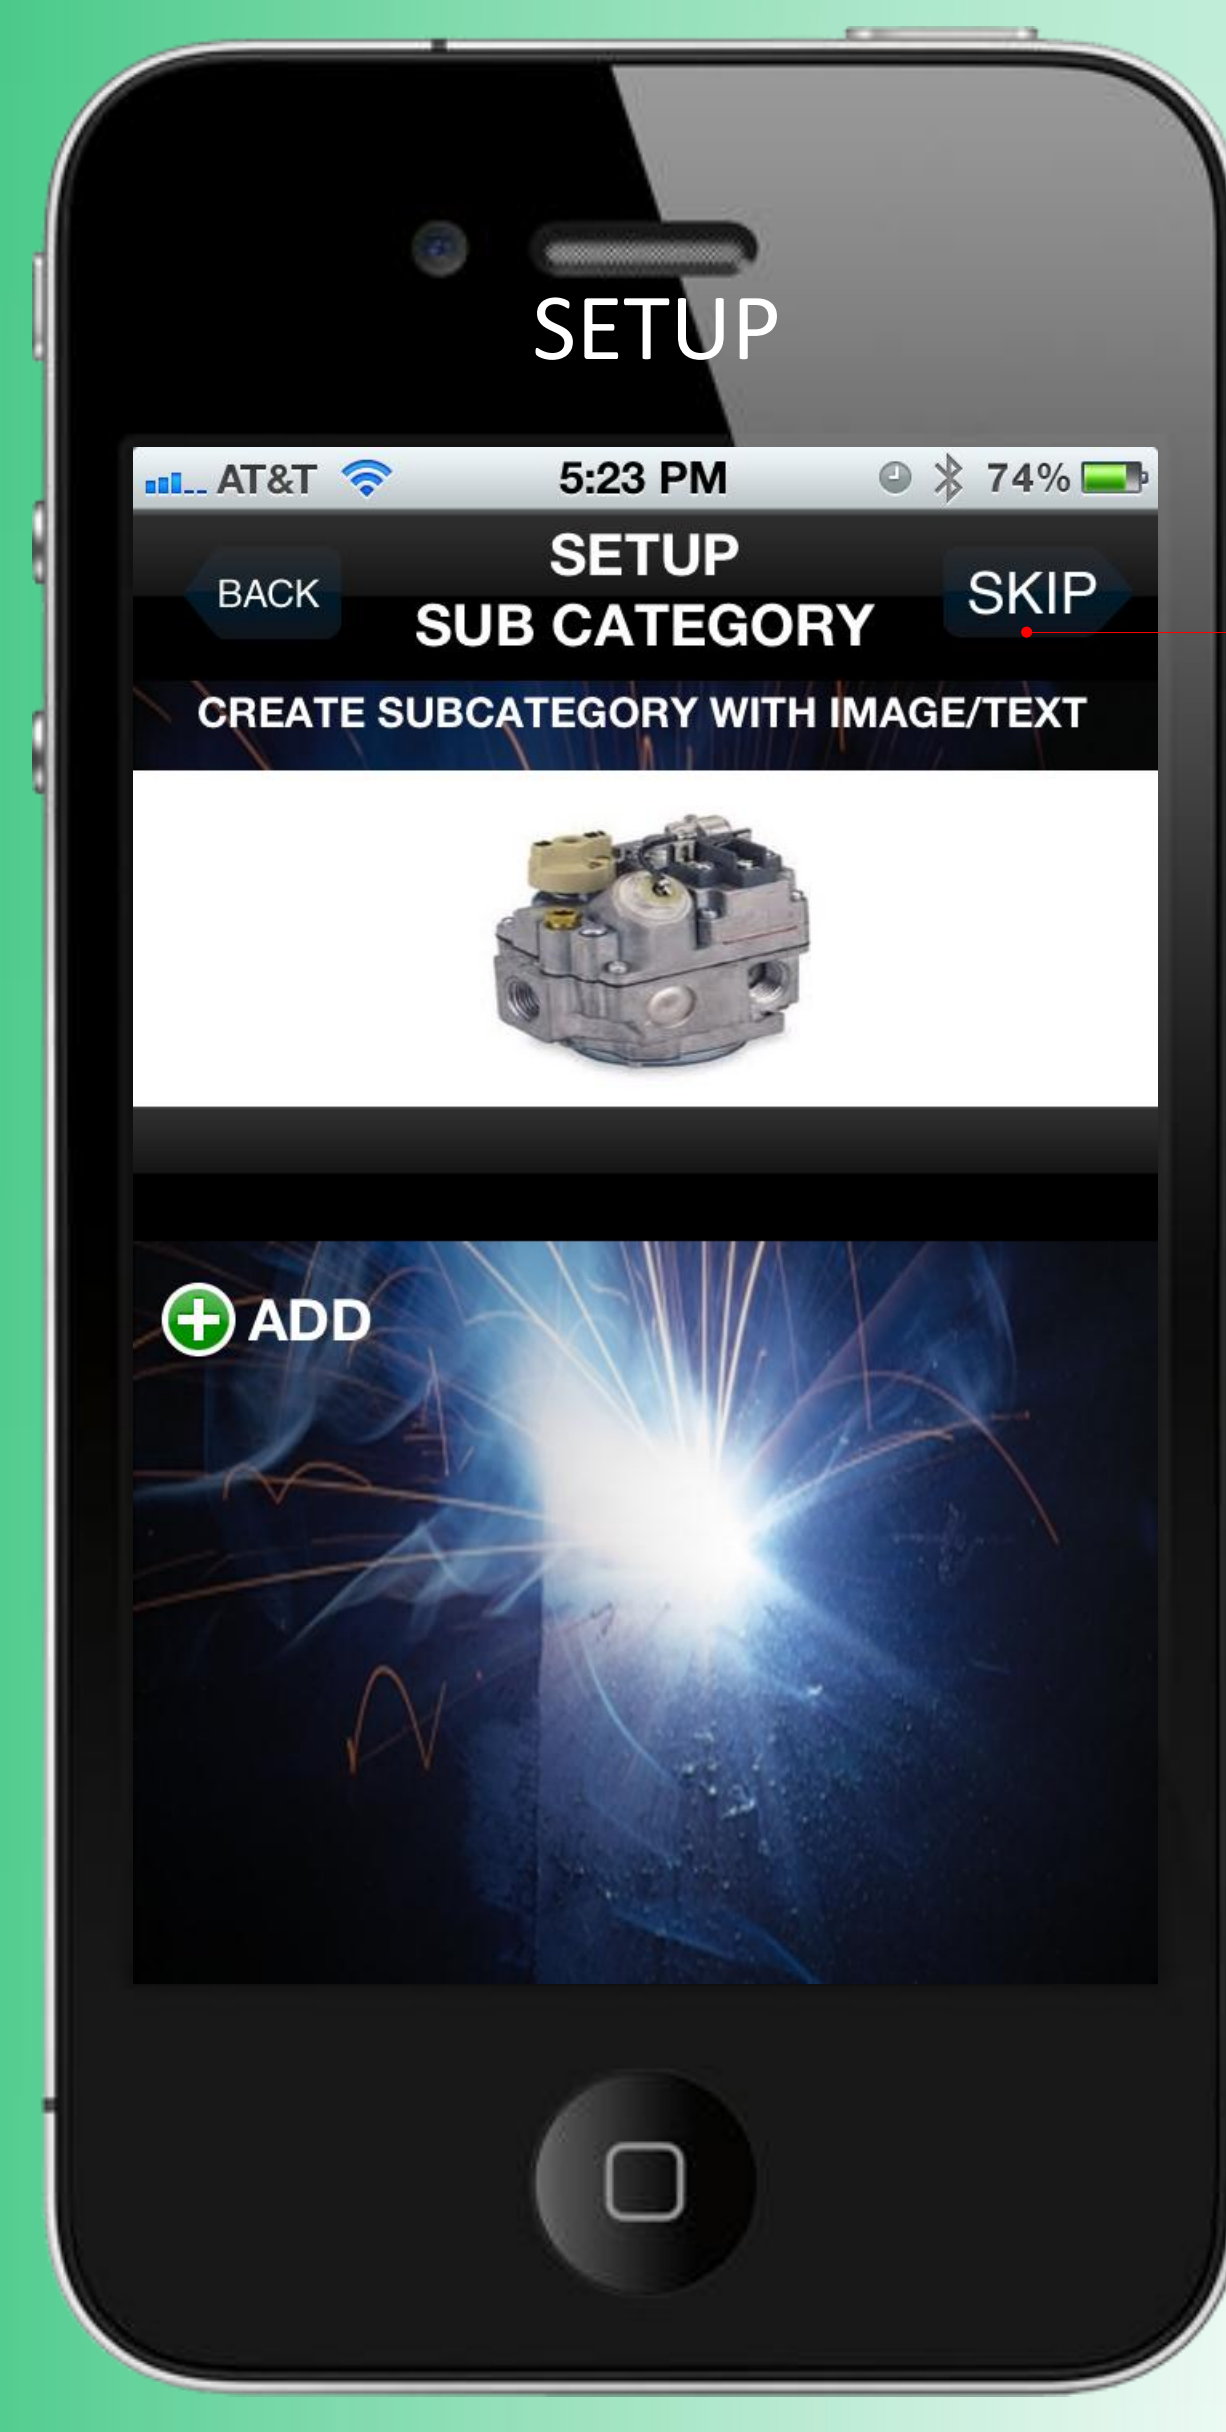

1. Start with selecting **EDIT**

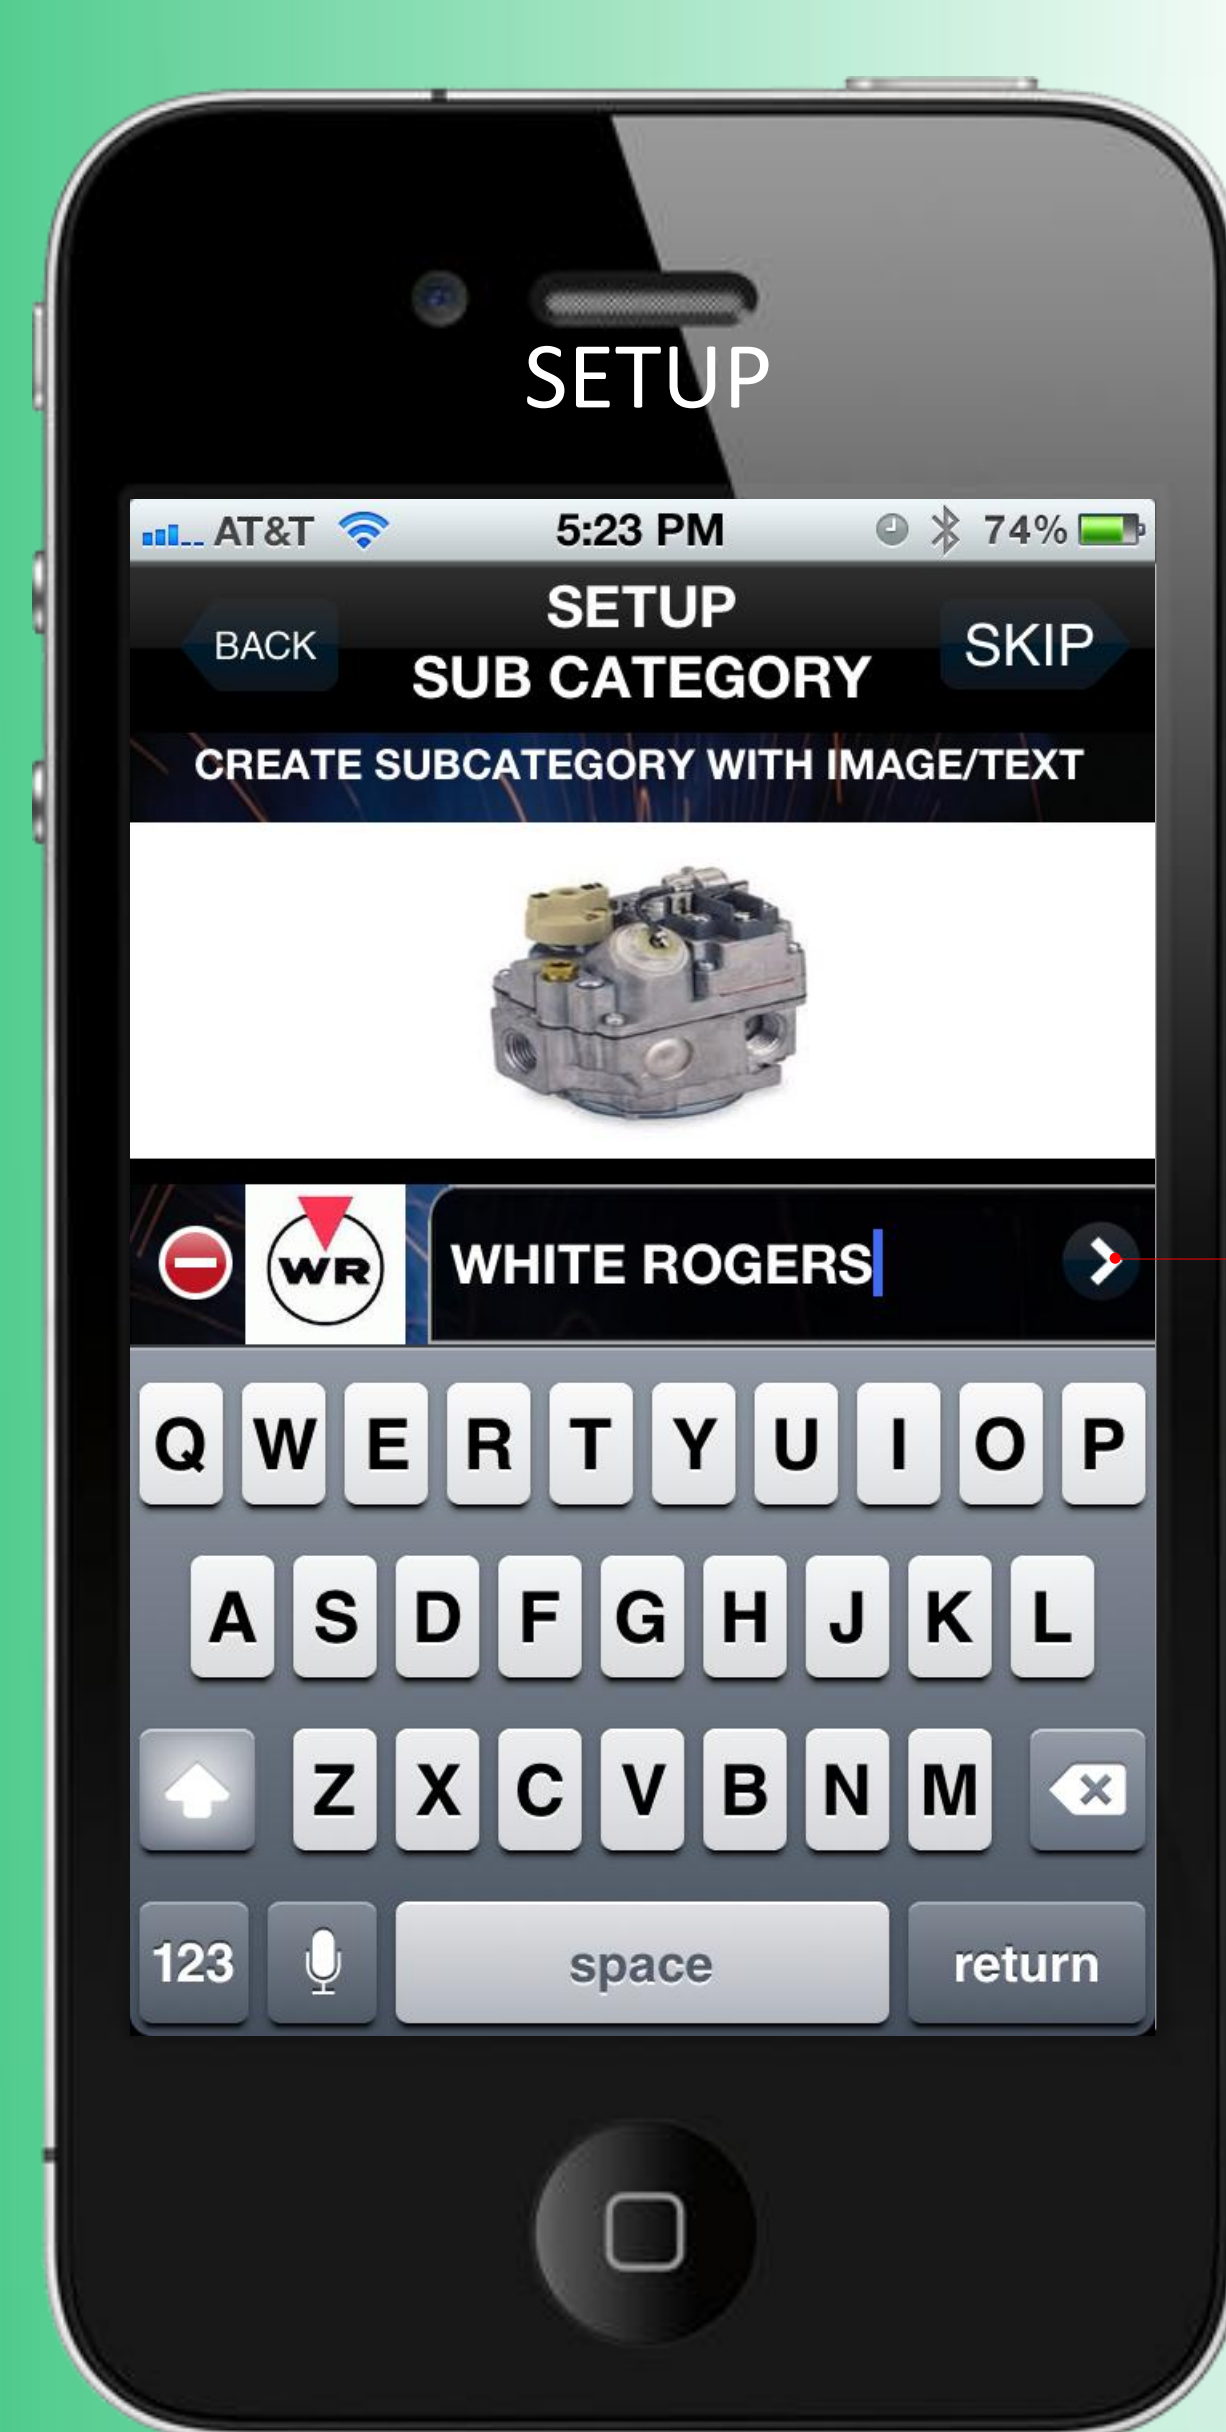

1. Enter image and text to describe the type of part.

2. Tap the arrow after complete.

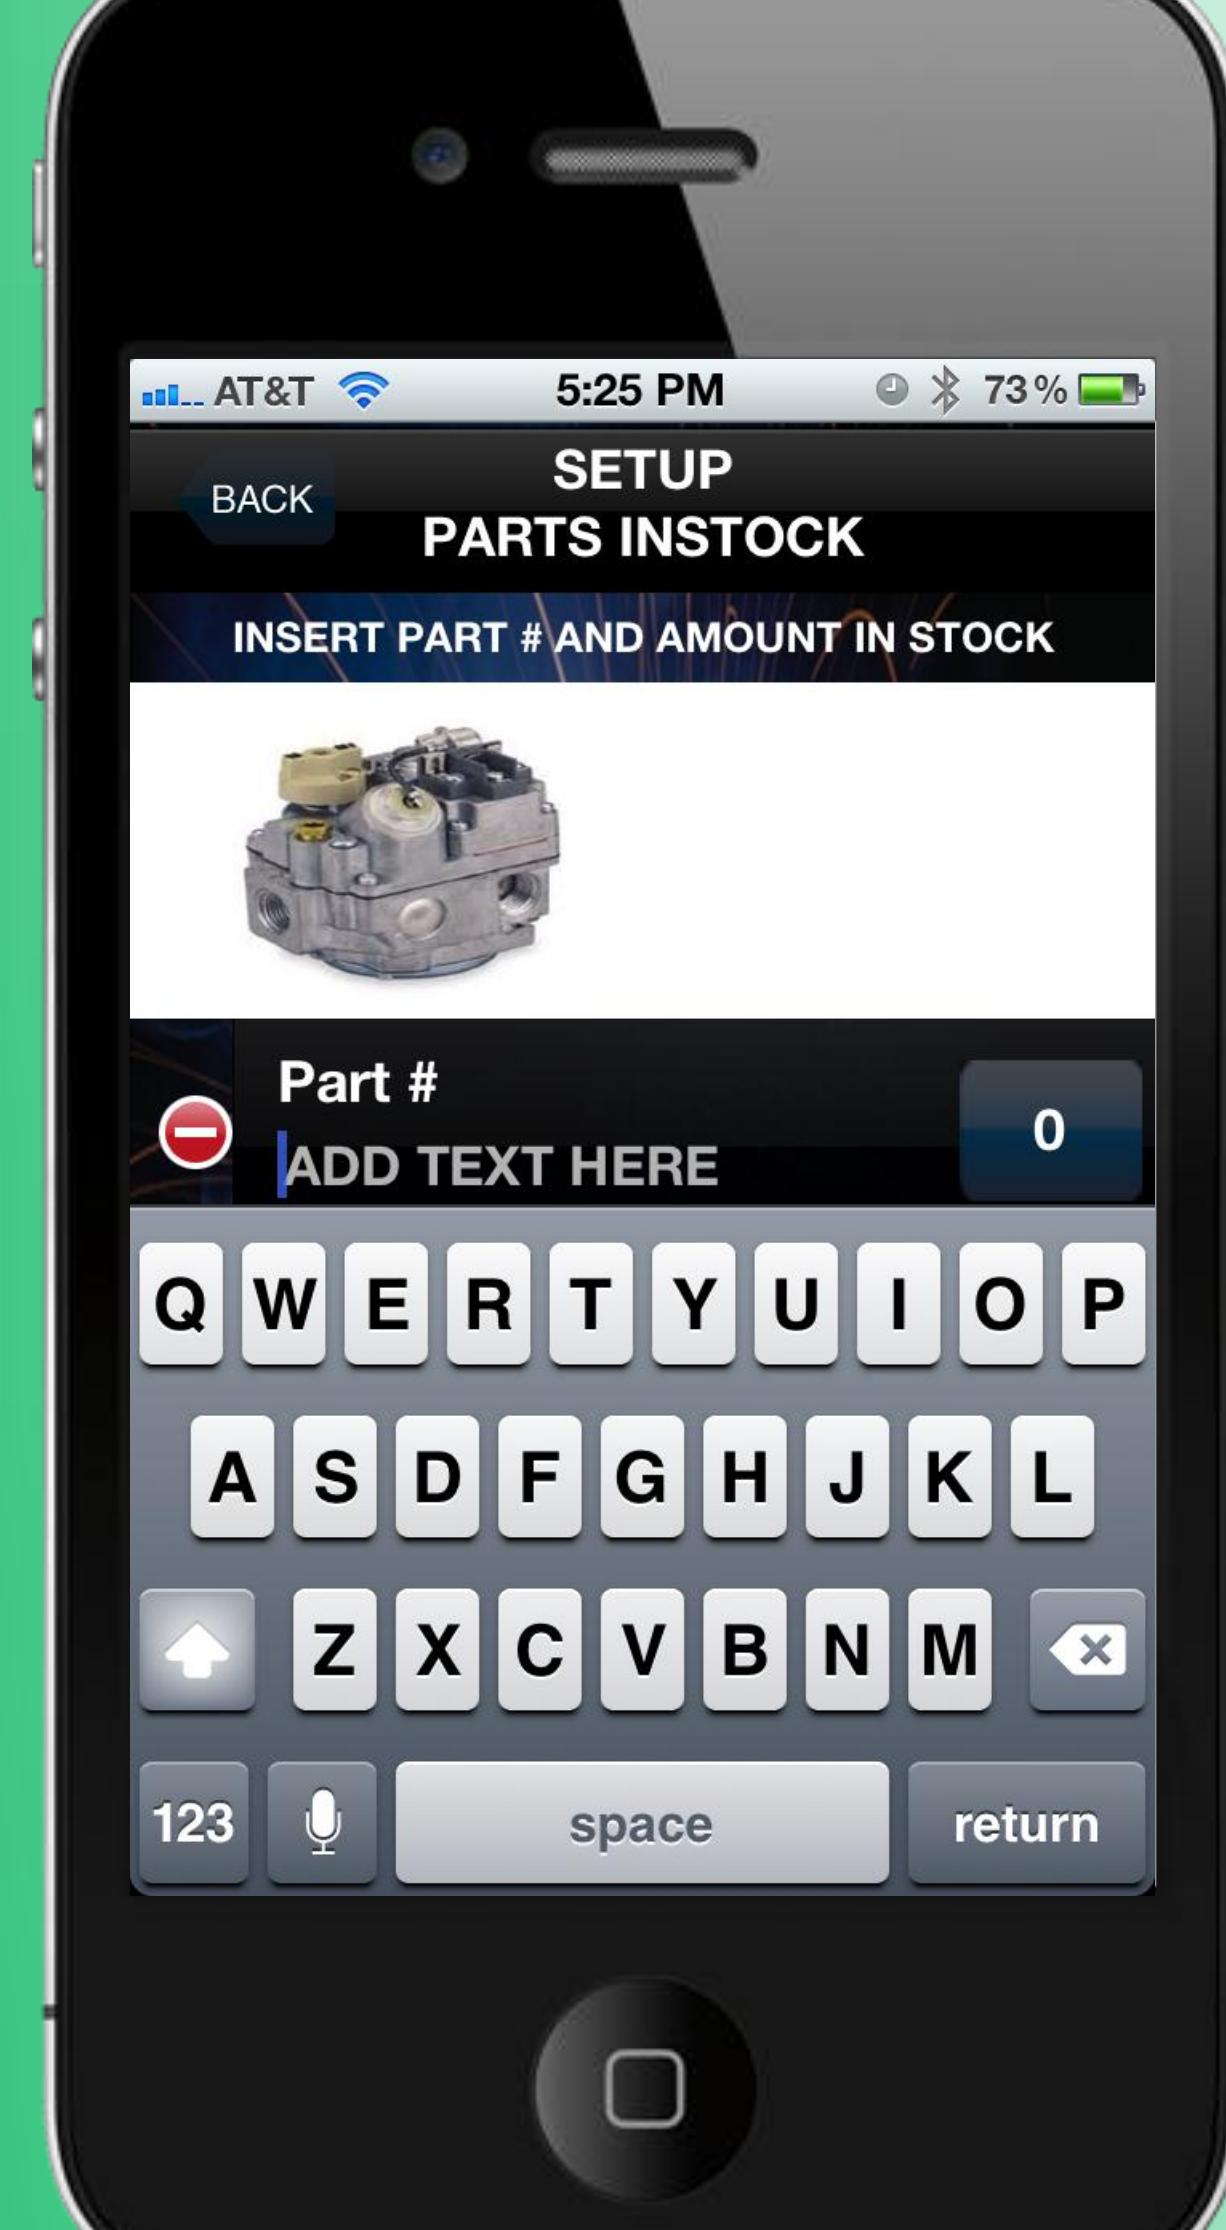

This is the sub category screen you can separate your parts by manufacture or parts house etc...or you can **SKIP** this step and move on to the parts list

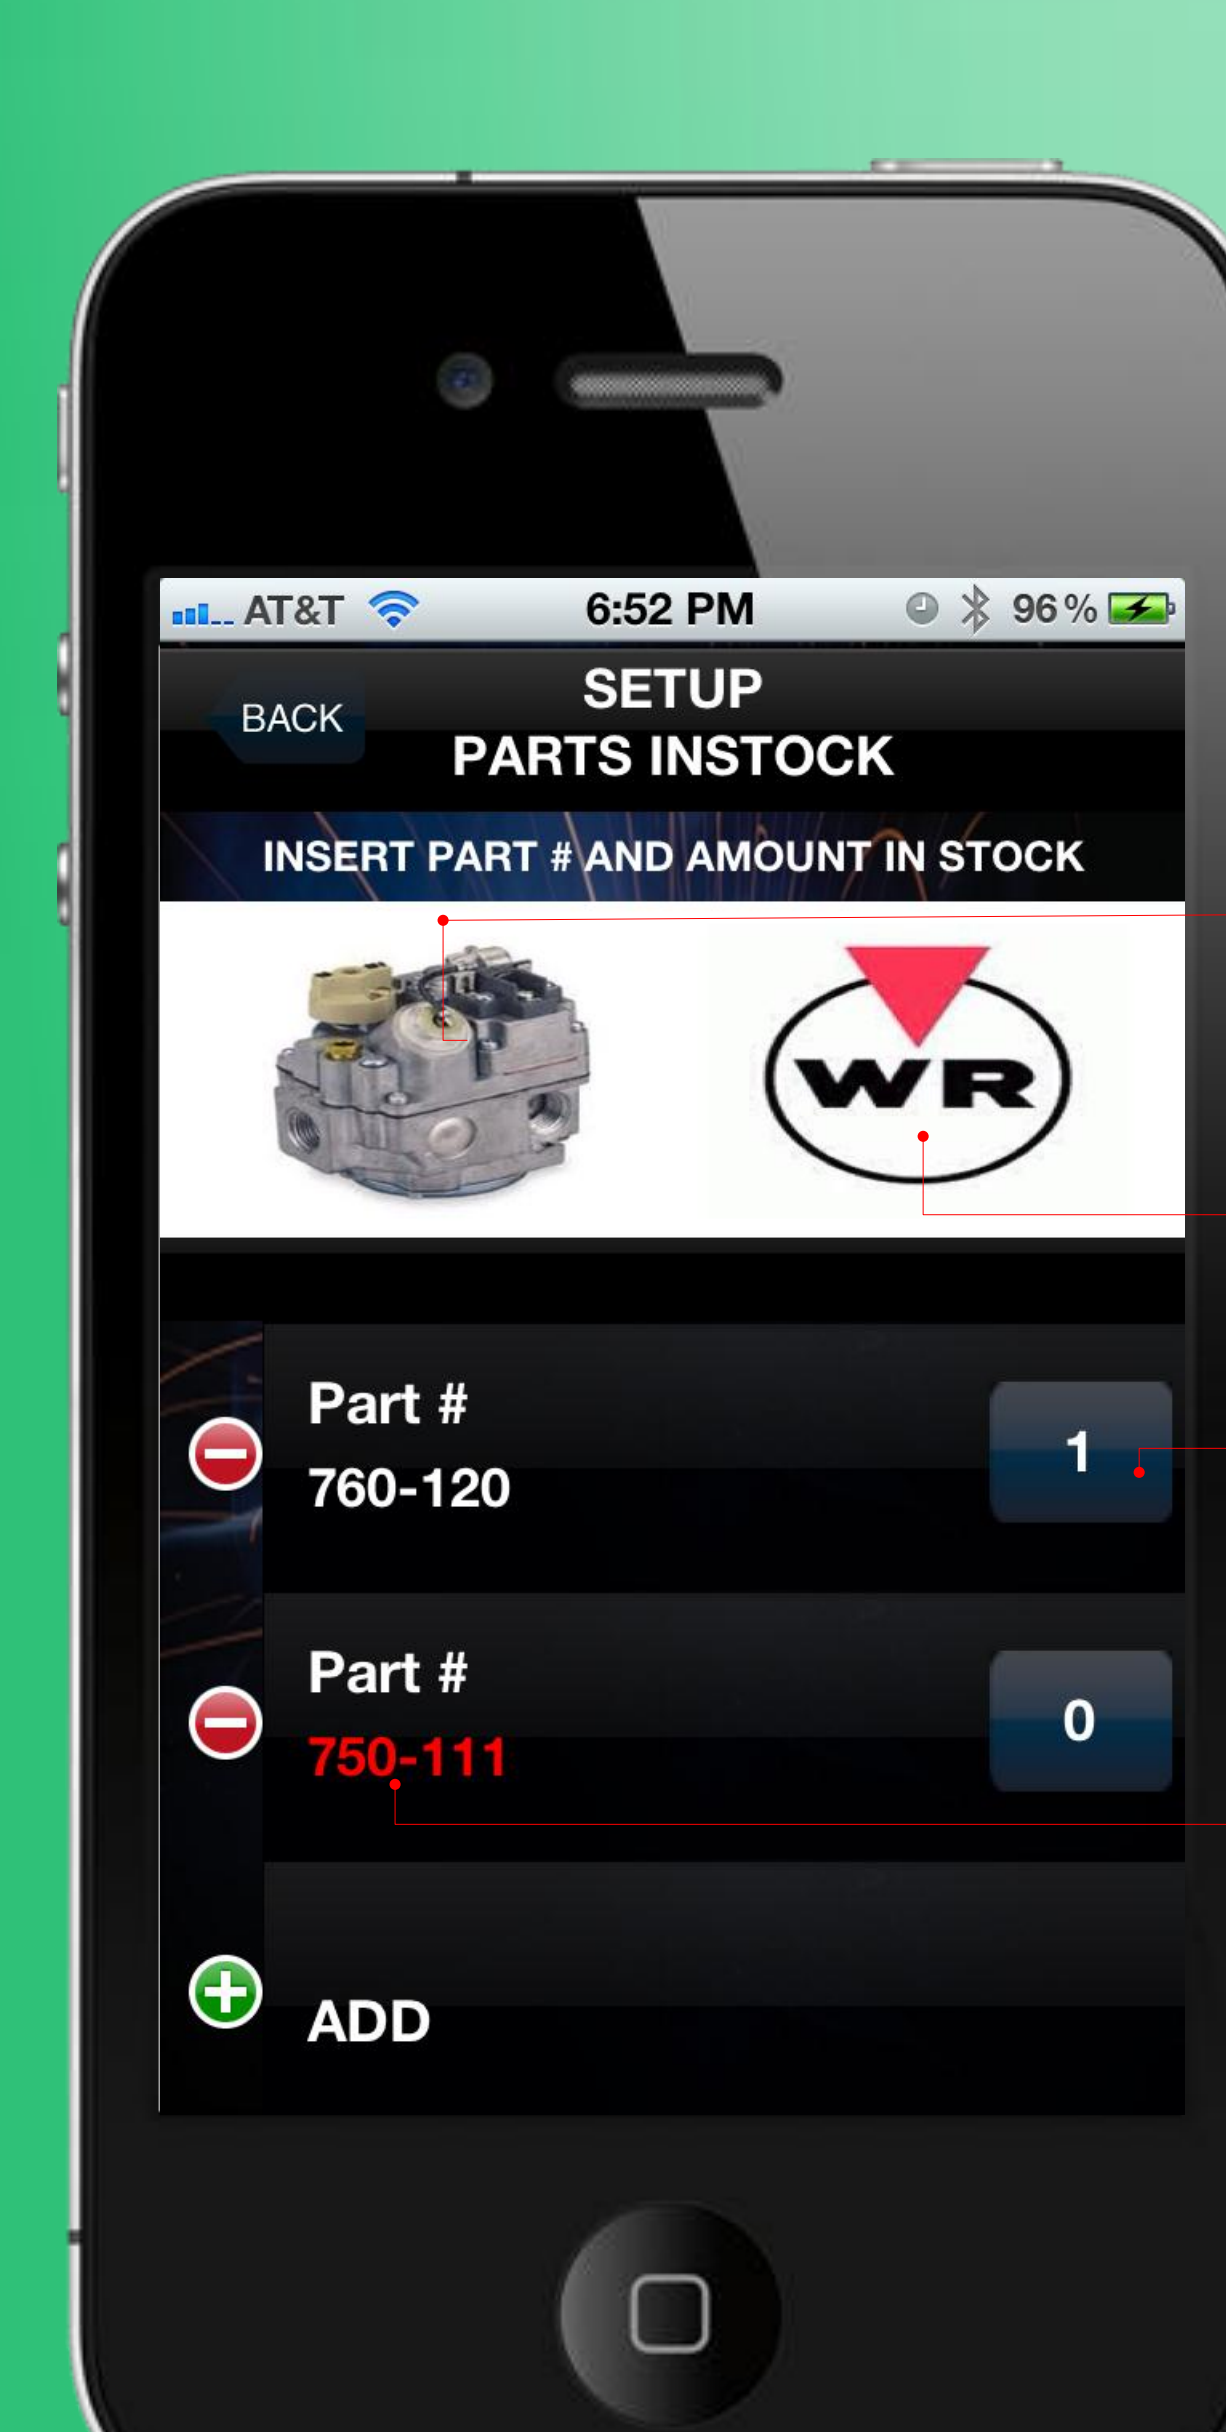

If you choose to create a sub category for this part add image and text for that subcategory.

Tap the arrow after complete.

Here we have skipped the sub category and began adding part numbers for the gas valve category

Here we are adding part numbers for the white rogers gas valves

• Main category

• Subcategory

• Tap and add the amount you have in stock.

• Text is **red** if part is out of stock  
Add as many parts as needed for that subcategory tap the **BACK** button to add another sub category or back out to main category.
